Chon Manage Packages...

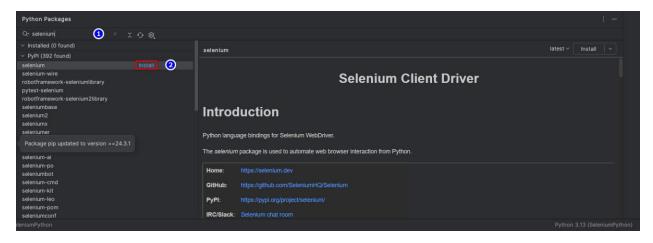

Gõ "pytest" vào khung search và click "Install"

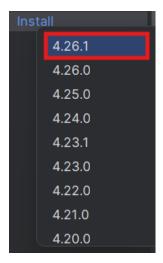

Chọn version 8.3.3 mới nhất

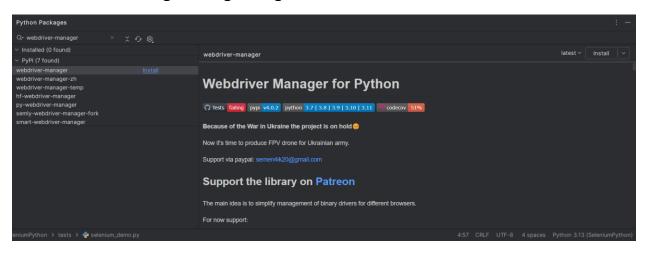

Gõ "selenium" vào khung search và click "Install"

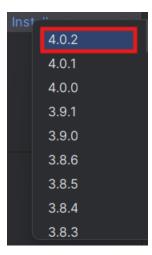

Chọn version 4.26.1 mới nhất

Gő webdriver-manager trong khung search và "Install"

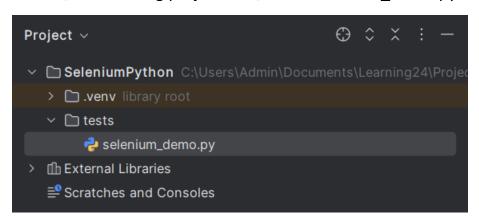

Chọn version 4.0.2 mới nhất

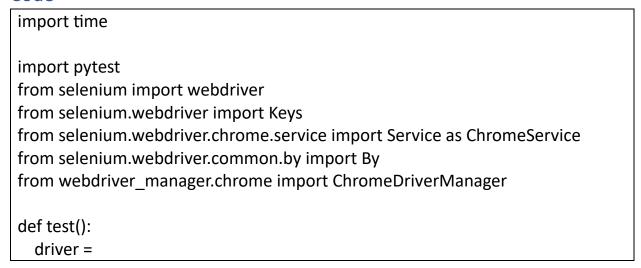

Tạo thư mục và file code

Thư mục tests trong project và tạo file "selenium_demo.py"

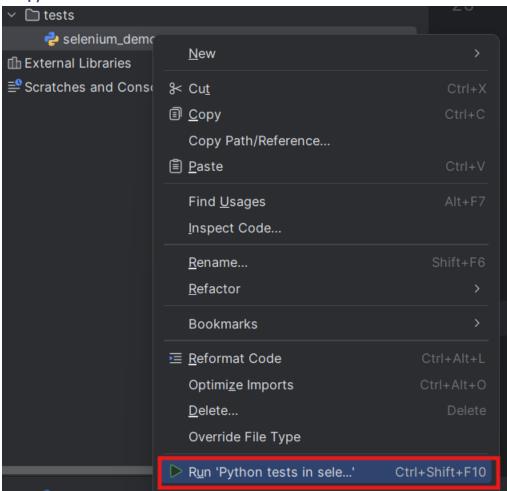

Code

```
webdriver.Chrome(service=ChromeService(ChromeDriverManager().install()))
driver.get("https://www.google.com")
searchField = driver.find_element(By.ID, "APjFqb")
searchField.send_keys("Selenium")
searchField.send_keys(Keys.RETURN)
time.sleep(5)
driver.close()
driver.quit()
print("Done!")
```

Chay code

Kết quả:
